

CrisisMesh — Fortified Enterprise Fleet

Autonomous coordination on your org's own data: your rooms, staff, routes. Runs fire, active-threat, cyber and medical response, chases whoever hasn't answered, hands them to a named human.

7 agents on Google ADK · Gemini 3.5 Flash on Vertex AI · Cloud Run (max–instances=4) · verified live 30 Aug 2026

FULL SYSTEM

MANAGED VS CUSTOM, AND WHAT EACH IS VERIFIED BY

Pillar	Google service	Status	Verified by
Agent Runtime	ADK on Vertex AI, Gemini 3.5 Flash	Managed	POST /incident/agentic/stream emits live delegation events
Content Scanning	Model Armor, template <code>crisismesh-guard</code>	Managed	POST /armor/scan → decided_by: <code>model_armor</code>
Memory Bank	Vertex AI Agent Engine	Managed	<code>scripts/verify_memory_bank.py</code> — recall by a query sharing no tags
Event Bus	Cloud Pub/Sub	Managed	publish → pull → ack, 4 topics
State	Firestore	Managed	<code>scripts/verify_durable_stores.py</code> — survives instance replacement
Registry · Identity · Gateway	Gemini Enterprise Agent Platform	Custom	IAM for provisioning unavailable in this project; disclosed in <code>PILLARS.md</code>

WHAT IT REFUSES TO DO

Situation	Response
Sighting log unreadable	EGRESS ASSESSMENT WITHHELD — no route may be called clear
Check-in ledger unreadable	Roster is the denominator; no record counts as unaccounted, and it says so
Lockdown in progress	No assembly point, no route directions to occupants
Arrival brief over WhatsApp	Refused — it names where people with mobility limits are
Model Armor unreachable	Degrades to regex and labels the verdict; never returns "clean"
Reach unknown	Reports 4 of 34, not 34 of 34
SMS not carrier-approved	Documented as upcoming, not counted as a live channel — zero SMS sent or received
