

CrisisMesh — Fortified Enterprise Fleet

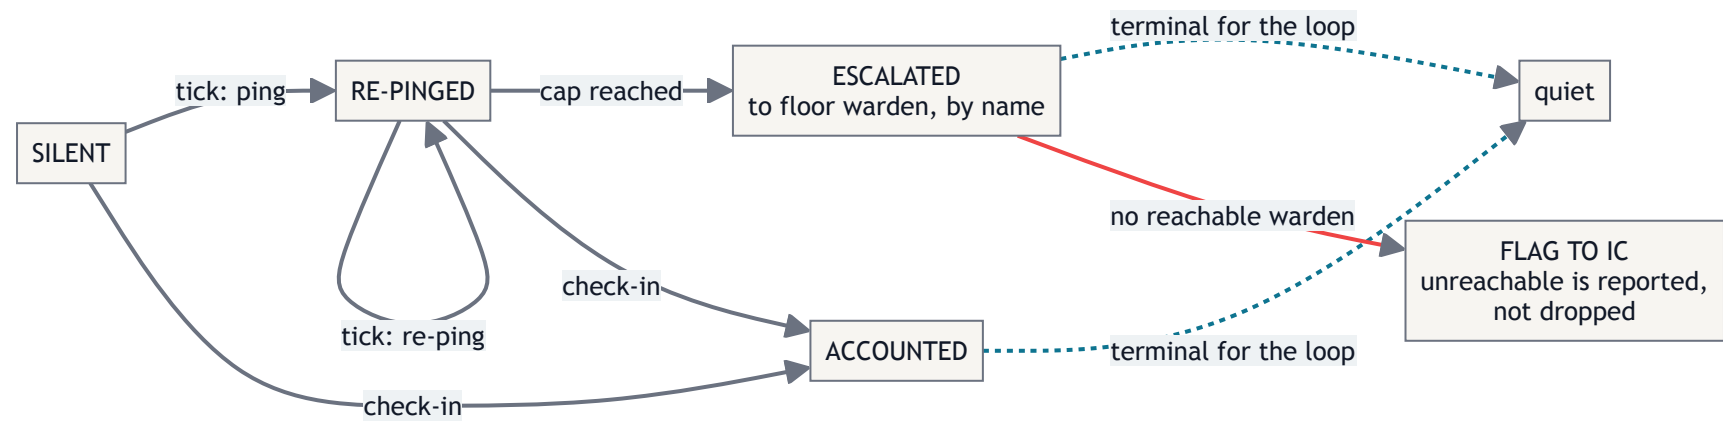

Autonomous coordination on your org's own data: your rooms, staff, routes. Runs fire, active-threat, cyber and medical response, chases whoever hasn't answered, hands them to a named human.

7 agents on Google ADK · Gemini 3.5 Flash on Vertex AI · Cloud Run (max-instances=4) · verified live 30 Aug 2026

FULL SYSTEM

THE AUTONOMOUS ACCOUNTABILITY LOOP — THE PART NOBODY WATCHES

MANAGED VS CUSTOM, AND WHAT EACH IS VERIFIED BY

Pillar	Google service	Status	Verified by
Agent Runtime	ADK on Vertex AI, Gemini 3.5 Flash	Managed	POST /incident/agentive/stream emits live delegation events
Content Scanning	Model Armor, template crisimesh-guard	Managed	POST /armor/scan → decided_by: model_armor
Memory Bank	Vertex AI Agent Engine	Managed	scripts/verify_memory_bank.py — recall by a query sharing no tags
Event Bus	Cloud Pub/Sub	Managed	publish → pull → ack, 4 topics
State	Firestore	Managed	scripts/verify_durable_stores.py — survives instance replacement
Registry · Identity · Gateway	Gemini Enterprise Agent Platform	Custom	IAM for provisioning unavailable in this project; disclosed in PILLARS.md

WHAT IT REFUSES TO DO

Situation	Response
Sighting log unreadable	EGRESS ASSESSMENT WITHHELD — no route may be called clear
Check-in ledger unreadable	Roster is the denominator; no record counts as unaccounted, and it says so
Lockdown in progress	No assembly point, no route directions to occupants
Arrival brief over WhatsApp	Refused — it names where people with mobility limits are
Model Armor unreachable	Degrades to regex and labels the verdict; never returns "clean"
Reach unknown	Reports 4 of 34, not 34 of 34
SMS not carrier-approved	Documented as upcoming, not counted as a live channel — zero SMS sent or received
